

# Construction Alert

**Water Plant #1 Shutdown Staging  
Starts July 21, 2014**

## Water Treatment Plant Expansion

Initial staging of equipment and materials for the Water Treatment Plant Expansion Project will begin July 21 2014. We will be providing dust control by applying a natural product, lignosulfate, the morning of July 25, 2014 in the area shown in red below. This area must be avoided during application and curing as it is very sticky until dry. Drying will require 12-24 hours. Therefore, this area will be barricaded during this time. An alternate route will be open during the daytime as shown in blue below.

Thank you for your patience during this project.  
We apologize for any inconvenience this may cause.

**If you have any questions please call Paul Siebensohn at 354-3700**
